Attention: Nereyda Dunn, Office of Managing Director

Reference: FOIA Request dated April 17, 2013
Contract Documents received April 19, 2013
Contract # PUR110000008

Subject: Freedom of Information Act (FOIA) Request # 2013-201

Dear Nereyda:

Computer Sciences Corporation (CSC) is in receipt of the subject request for the release of information relating to Contract # PUR110000008 and contract documents.

It is our understanding that the referenced letter and contract documents presents the documents in the complete form and to the full extent that you would intend to release them and that no further documentation is proposed for release at this time. If this is not the case, then please advise us accordingly so that we may respond to any additional proposed releases.

We have conducted a thorough review of the documents herein addressed. For the documents received with this request, no exception has been taken to the release of data.

Generally, our obliterations are made under 5 U.S.C. § 552(b) (4) Exemption for "trade secrets and commercial or financial information obtained from a person and privileged or confidential". However, we reserve the right to assert the full scope of our rights in response to any requests on a case-by-case basis, if such additional exemptions would apply.

Disclosure of CSC's financial, technical and management data would make this data available for CSC's competitors to pirate and would destroy the competitive advantage CSC has gained through its own efforts and must employ over the coming years in order to gain competitive business. This data goes to the heart of the competitive process in that it would allow CSC's competitors to undercut CSC's position in future competitions. Exemption 4 was made a part of the FOIA to prevent this very practice -- the attempt to get a "free ride" on a competitor's effort.

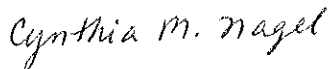

The information which CSC seeks to protect reflects CSC's valuable approach to contract

management, performance, employee relations and business processes which must be protected. CSC is an active participant in the competitive federal marketplace. As a result of our many years of experience, we have developed unique approaches to analyzing Government requirements and solicitation documents, to formulating, staffing, and presenting proposals and bids in response to Government solicitations, and to developing successful negotiation strategies and business methodologies.

Please be advised that CSC considers any portion or part of the pricing data CSC provided to the FCC as part of its proposal as "Proprietary Data," and therefore not releasable, without written authorization from CSC.

If you have any questions, or would like to discuss the matter further, I can be reached at (301) 429-7670 or via e-mail at cnagel2@csc.com.

Sincerely,

A handwritten signature in cursive script that reads "Cynthia M. Nagel".
